Statement of Support for SB334 - Center for Civic Excellence at Utah State University

Utah Parents United strongly supports SB 334 and urges the legislature to pass this important bill.

Creating a classical college at Utah State University honors and highlights classical education that our K12 curriculum has started deviating from. It is a wonderful method that supports a shift towards critical thinking skills and Socratic thinking. Additionally, this influence from higher education will impact K-12 curriculum and realign education back to a classic traditional pathway.

On behalf of the thousands of parents we represent, we respectfully ask for your support of SB334 to improve the academic offerings in Utah's education system.

Sincerely,

Utah Parents United
